

More than a silhouette.

An everyday essential. An unexpected interior. Discover a different way to think about headwear.

FORM, FUNCTION & A LITTLE FREEDOM

Style on the outside. Possibility within.

01 **A considered interior**

A pouch shaped to sit within the crown, with room for small, light items.

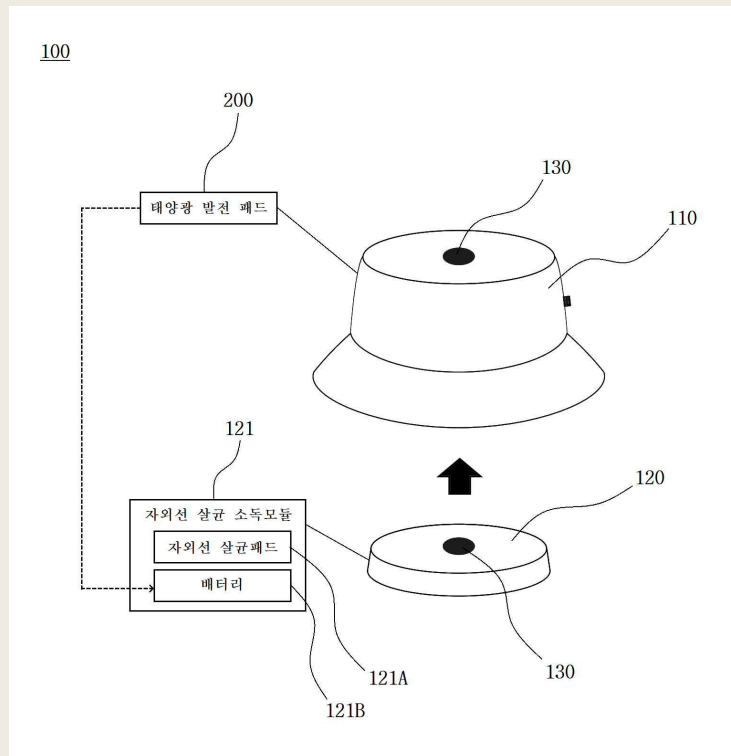

02 **Made to detach**

Separate the pouch, access its contents, then reconnect it to the hat.

03 **A platform for your brand**

Explore textiles, colors and product applications through a licensing discussion.

One hat. Another dimension.

110 / 120 / 130

Hat body · Detachable pouch ·
Fastening interface

121A / 121B / 200

UV pad + battery · Solar pad

01 Hidden within the crown

The tapered pouch fits into the upper interior. The sectional illustration makes the hidden structure visible.

02 Separate. Access. Reconnect.

Magnets and/or hook-and-loop fasteners connect the pouch to the hat. The movement is an explanatory animation.

03 Small space. Considered access.

A zipper or hook-and-loop opening is provided on the side or underside of the pouch. A folded textile illustrates storage only.

The Korean granted claim combines the pouch and lining with a detachable inward-facing UV pad, battery, solar charging and external charging after removal.

Schematic interaction, not an engineering simulation. UV is shown as a component only; no efficacy, operating safety or production readiness is asserted.

From a departure to an ordinary day.

01 / IN TRANSIT

A quieter kind of travel.

A clean silhouette, layered neutrals and a new perspective on the travel wardrobe.

02 / EVERYDAY

Part of your daily rhythm.

From a city walk to a coffee stop, a familiar accessory becomes a product conversation.

An idea with a documented structure.

Our presentation follows the granted publications, rather than the earlier application wording. The two jurisdictions have different claim scopes.

KOREA · REGISTERED PATENT

KR 10-2440110

Registered 31 August 2022

Granted claim 1 combines a tapered crown pouch, antibacterial and breathable lining, magnetic and/or hook-and-loop fixing, an opening, a removable inward-facing UV pad and battery, solar charging, and external charging after removal. Claims 2–5 were deleted.

Registration history is documented. Current legal status, territorial coverage and the scope of any license are reviewed individually. Concept styling does not define the claims. Material performance, fit, UV safety and manufacturing require product validation.

Your brand. A new possibility.

For licensing, product development and brand collaboration, tell us what you have in mind.

01 / DEFINE

Share your category, market and brand direction.

02 / EXPLORE

Review the relevant claims and develop a product brief.

03 / SHAPE

Discuss territory, scope, development and commercial terms.
